

GENERAL CONDITIONS

1. Permits for single trip movements shall be valid only over a specified route between pre-determined points of origin and destination. Permits for continuous trip movements of oversize/overweight vehicles shall not be for more than one year.
2. This permit covers only the person or firm designated as permitted and is not transferable.
3. This permit shall be carried in the vehicle during the movement and shall be shown on demand to any police officer or any authorized representative of the State Department of Transportation; provided that in the case of annual permits, this requirement may be met where a copy of the permit is carried in the vehicle, and the original permit is readily available for inspection from the operator's offices in the county of issuance.
4. The permit entitles the permittee to move only on the specified State highways and bridges. The right to use other highways is neither implied or granted.
5. This permit shall be effective only insofar as the State Department of Transportation has authority for its issuance, and does not release the permittee from complying with other existing state and county laws and ordinances which may govern the movement.
6. The permittee shall comply with all signs that are posted whether such signs are permanent or posted temporarily due to emergency conditions.
7. An oversize and/or overweight vehicle shall not at any time be loaded nor unloaded nor parked upon any State highway or bridge without permission from the State Department of Transportation or policing agency having jurisdiction over such highway, except in cases of emergency.
8. The permittee shall check structures and overhead utility lines for available clearance in overheight movements.
9. The permittee shall bind securely the components of the vehicle and load with appropriate load-holding devices to prevent creating any hazards.
10. The extremities of an oversize vehicle or load shall be marked with flags and lights and be accompanied with any required escort vehicles in accordance with existing state and county laws and ordinances.
11. The proposed movement shall be made so that the traveled way will remain open for traffic at all times. In movements over two-lane pavements, provisions shall be made for continuous movement of opposing traffic and for frequent passing by vehicles traveling in the same direction. If necessary, the vehicle shall be moved away from the traveled way at frequent intervals to allow traffic to pass.
12. Whenever the State Department of Transportation or policing agency having jurisdiction over such highways determines that the traffic, weather or other conditions will create a hazard in the movement, said Department or agency may at any time delay the movement under this permit.
13. If the permittee finds before or during the period covered by this permit that the movement cannot be completed during the specified period, the permittee may request for an extension of time. The permittee shall return the original permit to the issuing office for a validation of the requested time extension.
14. In the event of any change from the conditions authorized in the original special permit, such as change of route, increased size or weight, or correction of errors the permittee shall apply for a new permit.
15. The issuance of this permit shall not in any way be construed as a warranty by the State that the route to be used for the movement is in a safe and usable condition.
16. Misrepresentation of information set forth in the application for this permit or noncompliance with the limitations in weight and dimensions, route of travel, or other provisions as stated in this permit shall render this permit null and void.
17. The Director reserves the right to revoke the permit at any time for any justifiable reason.
18. No duly authorized representative of the State shall be responsible personally for any liability arising under this permit; and, furthermore, the permittee shall save and hold harmless the State and any of its officers, agents, representatives, successors, and assigns from any and all suits or actions of every nature and kind which may be brought for or on account of any injury, death, or damage, directly or indirectly arising or growing out of the acts or omissions of the permittee, its officers, agents, employees, or servants in the use of this permit.
19. The applicant shall file with the District Engineer a certificate of self-insurance or a certificate of any insurance carrier authorized to do business within the State of Hawaii certifying that there is a comprehensive automobile liability insurance policy covering said applicant and his authorized agents, executors, administrators, heirs, and assigns, and naming the State as additional insured for liability in the minimum amount or \$100,000 for Bodily Injury to or Death of one person in any one accident, and in the amount of \$300,000 for Bodily Injury to Death of more than one person in any one accident, and in the amount of \$50,000 because of damage to or destruction of property of others in any one accident.

In the event liability minimums higher than those specified are required by law, the higher shall prevail.

SPECIAL PROVISIONS
